## Key terms defined from this section

**Resolution attempts** is the same as total "resolutions" above.

**Resolved at handle** is the number of resolutions that successfully looked up at [doi.org](https://doi.org).

**Handle failures** is the number of resolutions that failed to look up at [doi.org](https://doi.org), either due to a technical error or a broken link.

**Resolved at local link server** counts resolutions that were looked up at local link servers.

## Successful resolution counts by publication title

The number of total DOI resolutions per title.

## Key terms defined from the failed resolutions report

**Unique DOIs attempted** is the number of unique DOIs represented in the total "resolutions attempted"

**Unique DOIs resolved at handle** is the number of unique DOIs represented in the "resolved at handle"

**Unique DOIs that failed at handle** is the number of unique DOIs represented in the "handle failure"

**Unique DOIs resolved at local link server** is the number of unique DOIs represented in the "resolved at local link server"

The attached file, if present, contains all of the DOIs that failed to resolve followed by the count indicating the number of failures. "na" - means that data is not available for that month and type.

## Resolution failure rate

The overall resolution failure rate (the percentage of DOI resolution attempts that failed) for all public DOIs or the overall average please investigate to determine the cause.
