### Your failed resolutions report for the month

This section of the report provides a list of DOI resolution attempts that failed (i.e. resolved to a Handle error page). This list is presented as a .csv file attached to the report email and contains both the failed DOI and number of failures.

Your failed DOI resolutions for this month can be viewed in [csv format](#).

### Resolutions by month

This section of the report provides the total number of resolutions per month for the past 12 months, by prefix (count) and overall (all members).

### Resolutions by the numbers

This section of the report provides the resolution counts for the report prefix.

|   |        |
|---|--------|
| Resolutions attempts                      | 10,263 |
| Resolved at Handle                        | 9,011  |
| Handle Failures                           | 1,252  |
| Resolved at local link server             | 0      |
| Unique DOIs attempted                     | 3,532  |
| Unique DOIs resolved at handle            | 2,961  |
| Unique DOIs that failed at handle         | 571    |
| Unique DOIs resolved at local link server | 0      |

### Key terms defined from this section

**Resolution attempts** is the same as total "resolutions" above.

**Resolved at handle** is the number of resolutions that successfully looked up at [doi.org](https://doi.org).

**Handle failures** is the number of resolutions that failed to look up at [doi.org](https://doi.org), either due to a technical problem or because the DOIs did not exist.

**Resolved at local link server** counts resolutions that were looked up at local link servers.

### Key terms defined from the failed resolutions report

**Unique DOIs attempted** is the number of unique DOIs represented in the total "resolutions attempted" from above.

**Unique DOIs resolved at handle** is the number of unique DOIs represented in the

"resolved at handle" count from above.

**Unique DOIs that failed at handle** is the number of unique DOIs represented in the "handle failures" count from above.

**Unique DOIs resolved at local link server** is the number of unique DOIs represented in the "resolved at local link server" count from above.

The attached file, if present, contains all of the DOIs that failed to resolve followed by the count indicating the number of times that DOI was attempted.

**"na"** - means that data is not available for that month and type.
